

"A Town of Reborn Poland..."

publication by the Lublin Open Air Village Museum

#stayhome

While we all stay at home, our museum recommend reading our publication **"A Town of Reborn Poland - the exhibition and landmarks in the Lublin Open Air Village Museum about the influence of the law of the Second Polish Republic on values and everyday life"**.

Lublin Open Air Village Museum publishing house presents the interiors and items connected with them as well as indicates museum events inspired by them, taking place in a provincial town in the open-air museum in Lublin. The catalogue contains photographs, illustrations, catalogue notes and notes historically binding the presented objects, as well as proposals for educational activities based on them. It is the result of many years of research by the Museum's academics, authors of exhibition scenarios and custodians of the collections that are crucial for the catalogue's content.
