

PRE- MEDICAL FIRST AID training for Museum employees

On Wednesday, 12th of April, our employees took part in pre-medical first aid.

During that, they had an occasion to gain their knowledge about giving first aid to adults and children. They learned e.g. how to maintain the vital functions, how to treat an unconscious person and what is the cardiopulmonary resuscitation. In the practical part, they practiced e.g. resuscitation on professional phantoms.

The training was conducted by instructors from the Post-Secondary School - Medical Vocational College of S. Liebhart in Lublin. Thank you!
